Chairman Message:

FOUNDATION MARKS DEDICATED SERVICES FOR ECONOMIC & SUSTAINABLE DEVELOPMENT

Zia Siddique Foundation was formed with the main intention to transform lives of poor, under-privileged and marginalized communities. Over the period of years, Foundation has made paramount progress to ameliorate living standard with improving of health preventive and curative services, quality formal and technical education. The key-projects of Foundation; Zia Siddique Memorial Hospital, National Degree College for Girls, National Model School, National Institute of Information Technology, Institute of Religious Studies and Pak Emirate Polytechnic Institute has remarkable prosperous stories in respective sectors, and helped hundreds of thousands of people to improve their living standards and walks in respective manners.

This year, Foundation initiatives were undertaken to amend and modify standards and deliveries of key-projects with consistent support of our altruistic donors beyond undertaking the projects of Punjab Skill Development Foundation, FATA Development Authority, Bait-ul-Mal and World Vision to equip the youth with technical skills.

I am sure these projects helped youth to secure their future and will transform the living standard of their families leading to build a placid, progressive and prosperous Pakistan.

I am also thankful to Helping Hand for Relief and Development for their in-kind donation of medical equipments for Zia Siddique Memorial Hospital, this will help us to take lead on servicing of patients efficiently.

I am very proud to be associated with this organization, and I look forward to seeing the management team use new resources and ideas to meet any challenges that may lie ahead.

Chairman
Zia Siddique Foundation

Organizational Philosophy:

Zia Siddique Foundation is non-profit organization established in 2001. It is community based organization, having its roots in AJK and Pakistan operating internationally as well. The organization works to promote quality education, health, and sustainable economic and social development by working with local and deprived communities throughout Pakistan.

VISION

Zia Siddique Foundation envisions a society achieving rightful socio-economic, educational and health development with safeguarded ownership of resources.

MISSION

Zia Siddique Foundation mission is to alleviate poverty by harnessing the potentials of communities' through organizing, mobilizing and building their capacity for sustainable development.

OBJECTIVES

- Provision of quality education and health services to the deprived and destitute communities in Pakistan and AJ&K.
- Empowering women and girls to ask for their due rights and provision of vocational trainings to generate their incomes
- Provision of technical, vocational, career counseling and entrepreneurship trainings for human resource development
- Working with persons of disabilities and providing them skilled training to generate their income
- Promoting awareness in the local communities to preserve environment and plant trees to make Pakistan green
- Aim to increase sustainable livelihood opportunities among the marginalized and poor communities
- Relief and rehabilitation
 - ✓ Quality Education and Learning
 - ✓ Health facilities and services
 - ✓ Women and girls empowerment
 - ✓ Youth Leadership development
 - ✓ Human Resource Development

Education and Women Empowerment:

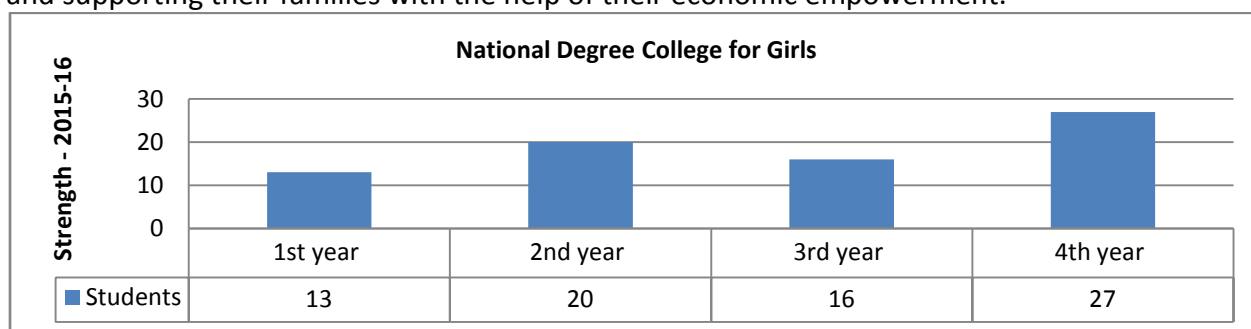

The Fateh Aalam Shaheed Educational Complex was established in year 2001 in the village Datote, Rawalakot, AJK for the support of the poor and needy people of the area in the field of education from foundation to degree level.

The education complex is comprised of National Degree College for Girls, National Model School, National Institute of Information Technology and Institute of Religious Education, supported with well-furnished class rooms, well-equipped lecture and exam halls, reading and study rooms, science laboratories, computer lab, well-resourced library, recreation hall for students and faculty, hostel and mess facility for poor students and faculty and Staff.

National Degree College for Girls:

The National Degree College for Girls was established in 2007 to ensure easy access of quality education for the girls of the targeted area(s) successfully equipped thousands of girls with quality education.

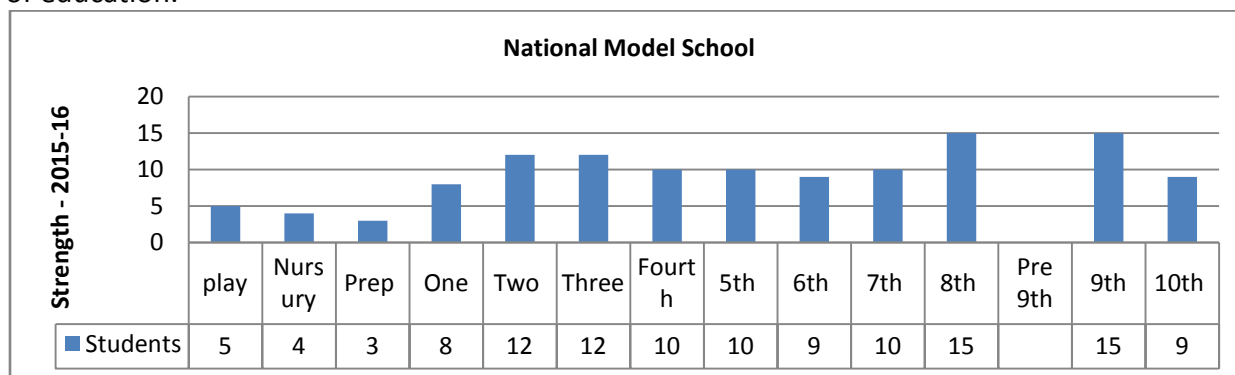

27 girls in 2015-16 graduated from college, 21 enrolled in other professional institutions for higher education in AJK and Pakistan, and other secured their job in public and private sector and supporting their families with the help of their economic empowerment.

National Model School:

National Model School was established in the year 2003. It is located in a modern trend setting impressive building, unmatched in the area. In the school about 50% of the students receive free education, and about 35% of the students pay subsidized fee, whereas 15% of the students belonging to comparatively well-off families pay full fee to ensure financial sustainability of NMS.

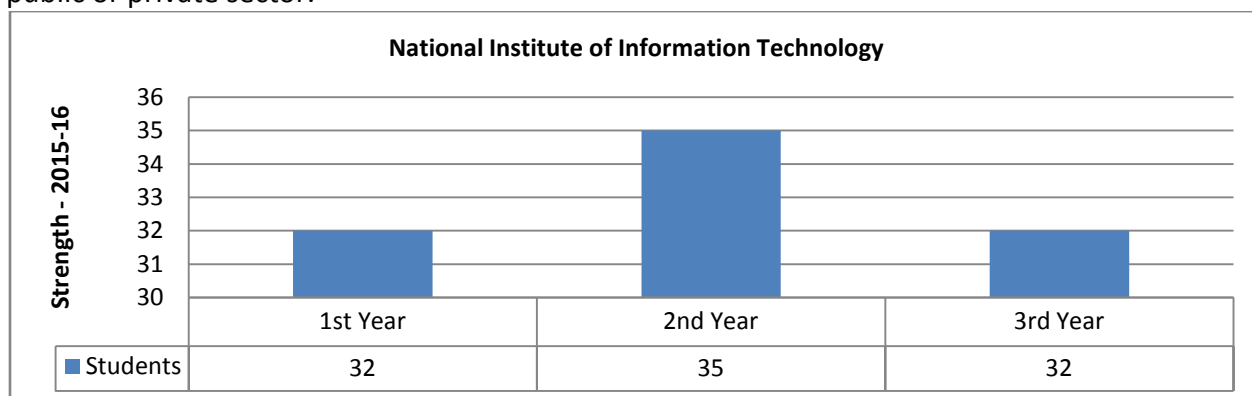

9 students passed their matriculation level successfully in 2015-16 and promoted to higher level of education.

Institute of Information Technology:

The National Institute of Information Technology was established in the year 2003 with purposes to equip the girls and boys with IT based skills for their capacity enhancement and offers IT courses ranging from one month to one year.

32 boys and girls earned their one year IT diploma in 2015-16, and pursuing their career in public or private sector.

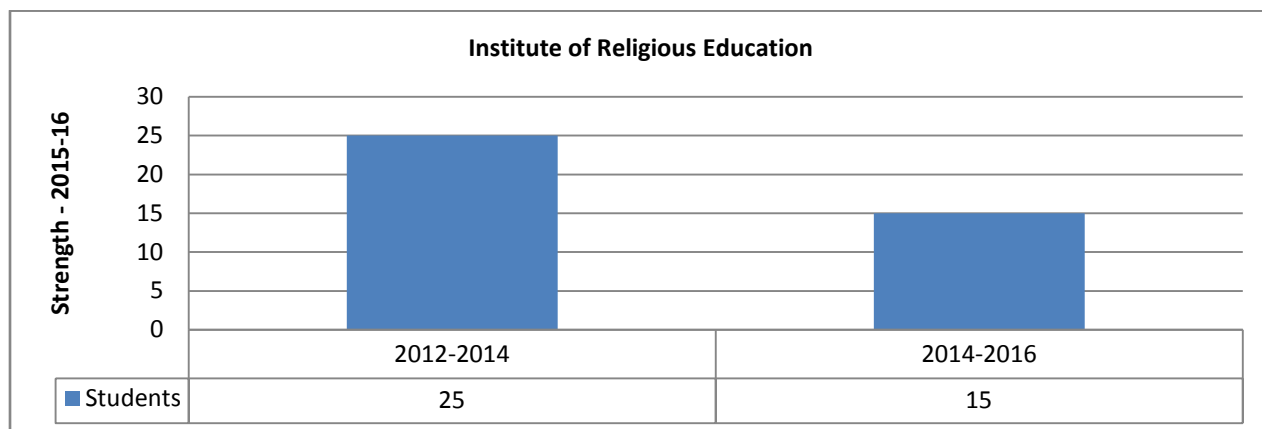

Institute of Religious Education:

The Institute of Religious Education was established in the year 2002 with focus on that religious education plays a vital role in grooming a person into a well balance personality.

Institute offers one to two years Islamic studies program that includes basic Nazira, Hadees, Fiqa, translation and basic knowledge of Holy Quran.

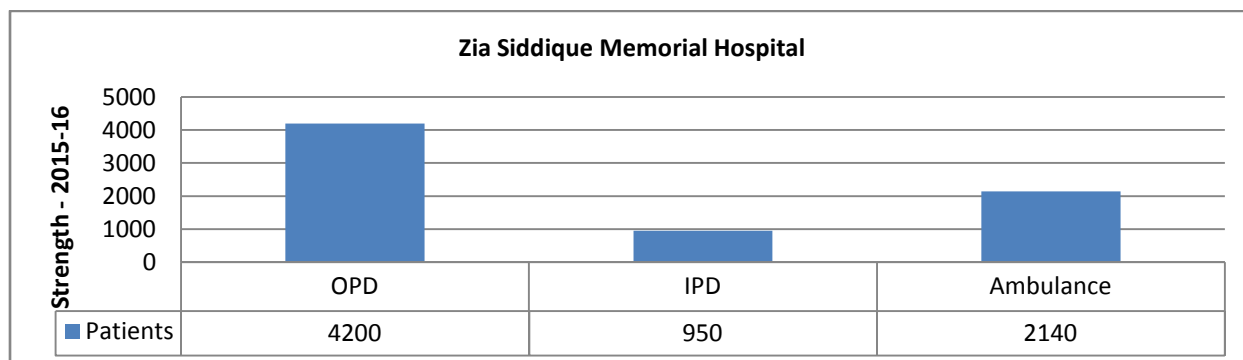

40 girls are enrolled in one to two years Islamic studies program with session of 2012 -14 and 2014 - 16.

Health Services:

The Zia Siddique Memorial Hospital established in September 2006 there in Datote, Rawalakot, with partnership of Pakistan Bait-ul-Mal to deliver health preventive and curative services. The project has so far benefited large population of the targeted areas. The hospital is managed with support of experienced doctors and staff, and equipped with IPD services, OPD services, pharmacy, Operation Theater, Gynecology, laboratories, other latest machines and patient-beds. The hospital is supported with ambulance services to meet the emergency situations.

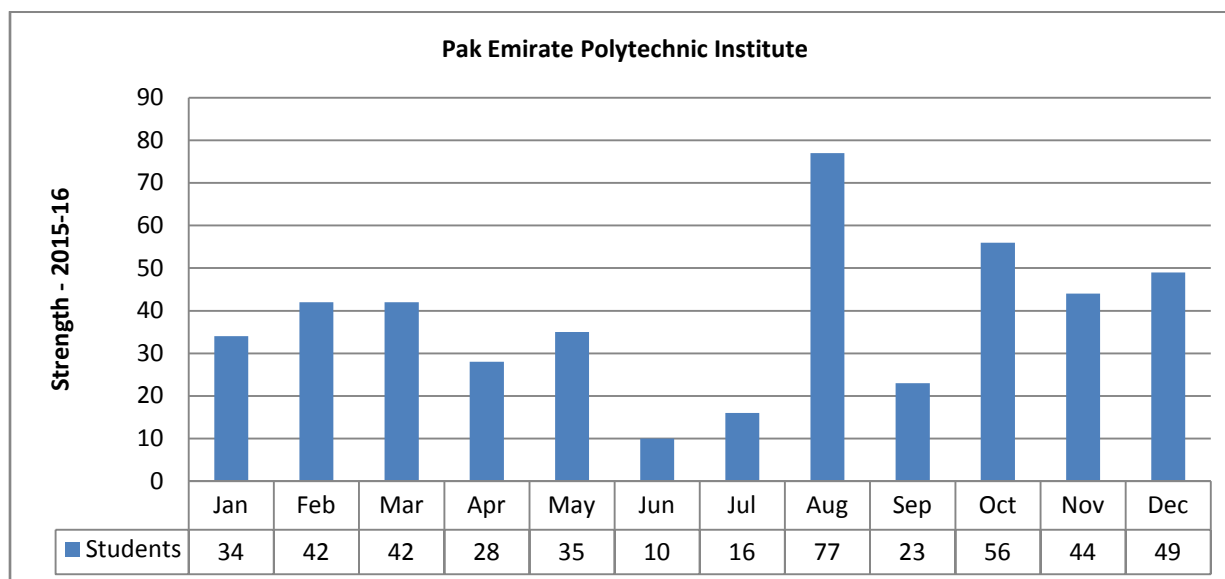

In 2015-16, OPD services dealt with 4200 persons, whereas IPD handle 950 patients and ambulance faced 2140 emergency situations.

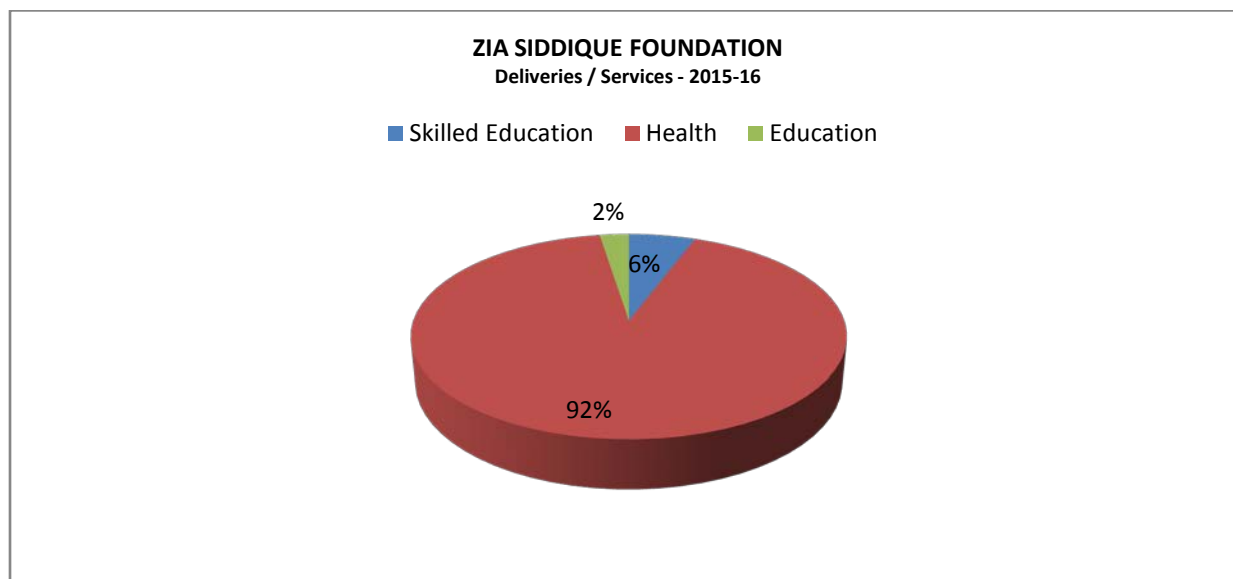

Skills Enhancement Services:

Pak Emirates Polytechnic Institute established in 2007 to address issues of youth unemployment, to foster international competitiveness in skills development to bridge-gaps the dire desiderata of employment.

In 2015-16, Pak Emirate Polytechnic Institute with partnerships of Punjab Skill Development Foundation, FATA Development Authority, Bait-ul-Mal and World Vision launched technical courses of various trades ranging from one to six months.

Future Plans:

Our committed staff is always at standby position to uplift the social standards and walks, and is progressing towards its vision, mission and goals. Following are the major areas where we will enhance our focus:-

- To undertake research and action activities in the domains of health, establishment of medical camps in remote areas, besides strengthening the values of ZSMH hospital and clinics.
- To empower youth with technical skills.
- To train the school kids, through development of WASH groups, and to aware community on health and hygiene.
- To work on DRR and disaster preparedness in disaster prone areas.
- To work on cultural preservation, with involvement of community.
- To work on safe drinking water, and environmental protection.
- To work on renewable energy.
- To ensure women and child rights.

Success Stories:

Ahsan Majeed S/o Abdul Majeed (PEPTI) verbalized that being the student of Pak Emirate Polytechnic Institute for Plumbing Course is authentically inspiring for me. It was very arduous job for me to get a job but due to this Institute now I am about to complete my technical course of Plumbing. I am sure after this I will get a good job in market. Whatever I will be tomorrow is because of this Institute. I am thankful to Zia Siddique Foundation for fortifying me in imparting the technical skills.

Sara Ishaq D/o Ishaq Khan (ZSMH) is a 30 years old mother living at Pachiot, Rawalakot. She is the mother of three children (two boys and one girl), and lives with her husband in a remote rural area of the Rawalakot. She is happy and manages a standard of living on which her family can afford most of the basic human needs. She has used the ZSMH health facilities whenever she has been pregnant, as well as after the deliveries of her three children.

Sara says, “During the pregnancy of my second child, I was able to go for antenatal visits at the ZSMH. One thing which I learned during my visit, which has helped me so far, is education on the ‘danger signs’ during pregnancies.” She continued, “Some of the signs, like bleeding and headaches, appeared to me when I was pregnant with my latest baby. I immediately rushed to the District Hospital for treatment and had my baby safely delivered.”

She even insists that, “If I had not done the antenatal care visits at the ZSMH I would not have been aware of the danger signs. Maybe I would have assumed the danger signs I faced were a normal thing for pregnant mothers, and stayed at home waiting for an unsafe delivery day.”

Noorul Huda D/O Afraz Khan (NDCG) thanked Zia Siddique Foundation. Further, she said that this college is near to my village, I come regularly to attend the classes. There is good environment and teachers are good. If this college would not have been there, I would have spent whole my life uneducated.
